

Water Treatment Institute offer high quality, competitive price equipments & chemicals for Ice Factory

Water Treatment Institute was established in 2002, its headquarter is based in Faisalabad.

Water Treatment Institute has now successfully expanded a group of companies to research, design and produce in own line of water treatment and equipment.

Water Treatment Institute is constantly Improving it's technologies and provides client, worldwide the most effective water treatment solutions for

- Ice Factories
- Drinking water
- Boilers
- Cooling systems
- Irrigation

Quality Assurance

Throughout organization everyone is fully aware of the importance of quality and customer satisfaction. The quality management system is set out in three technological areas, i.e. Production and servicing of **Water Treatment Chemicals**, production and installation of water treatment equipment and the production of **tablet salt according to ISO 9001, 2000** registered by the International certification network IQ Net. The Success is based on high standards ensuring quality products and customer care.

Research & Development

Water Treatment Institute never stops at the achieved. Research and development department is constantly expanding the range of products, improving the technologies and working with national and international research and scientific organizations, universities and institutes.

Water Treatment Chemicals

Wide range of multifunctional **MRI** products allows you to solve problems effectively in relation to industrial water & Drinking water treatment.

MRI products are not only effective and of high quality, but also has a system of complex services for users:

- Examination and analysis of the system's work.
- Revealing of problems and finding their reasons.
- Matching the right type of program and **MRI** Products.
- Delivery and installation of required dosing equipment.

After choosing **MRI** Chemicals, you will effectively solve industrial problems in relation to water treatment, you will save money, time and will get professional support.

Drip Irrigation ڈرپ اریگیشن

پاکستان میں اکثر علاقے ایسے ہیں۔ کہ جہاں زیر زمین پانی زراعت کے قابل نہیں ہے دریاؤں میں بھی پانی کی کمی واقع ہو رہی ہے۔ زیر زمین پانی میں نمکیات کی کثرت کی وجہ سے زرعی زمین بنجر بو رہی ہیں۔ انہی حالات کو مد نظر رکھتے ہوئے واٹر ٹریٹمنٹ انسٹی ٹیوٹ پاکستان میں پہلی مرتبہ ریورس اوسموسس پلانٹ زراعت کے شعبے میں متعارف کروایا ہے

جدید تحقیق کے مطابق ڈرپ اریگیشن (Drip Irrigation)

ایک ایسا کارآمد طریقہ ہے جس سے تھوڑے پانی سے زیادہ فصلیں اگائی جاسکتی ہیں ریورس او سموسس پلانٹ ڈرپ اریگیشن میں نہایت موزوں ہے

MRI Products in Water Purification Plants

- MRI - 50
- MRI - 250
- MRI - 500
- MRI - 1,000
- MRI - 5,000
- MRI - 10,000
- MRI -10,000 To 70,000

Reverse Osmosis

Treatment of reverse Osmosis Membranes.sis

MRI has started production of chemicals for **Reverse Osmosis membranes treatment**. These products are universal and compatible with all types of membranes. The name of this group of products also goes under the trademark **Tripol** with index 9010: There are several groups of these products.

The first **group-Chemicals** for prevention of membranes from scale. All chemicals are Food graded.

- Tripol 9010, Tripol 9015
- Tripol 8510, Tripol 8515
- Tripol 9510, Tripol 9515

The second group - Products that prevent biological fouling and the formation of calciumferrous deposits on the surface of membranes.
